# NETWORK ASSESSMENTS

BENEFIT FROM OUR EXPERIENCE!

Have you considered getting an outside, objective assessment and opinion of your business network? **BlackHawk Data** invites you to mitigate downtime and keep your business humming by taking a new look at your network..

## Determine the Capabilities and Shortcomings

Do you know your network's strength and weaknesses?

A professional network assessment identifies the sources of any interference in your network, as well as the areas of user density, the applications utilizing the most bandwidth, and the devices causing the most congestion. It also can point out all the things that working smoothly, and provide you with industry best practices so you can get the most out of your network.

## Locate Bottlenecks

Several inefficiencies can impact your network's performance, including the type of connections (fiber optic, copper, etc.), equipment installation problems, incompatible devices, user performance,

apps, hardware and connectivity. A professional network assessment can identify these bottlenecks, as well as any gaps in your infrastructure security, so you can fill in the gaps and enhance your performance.

## Establish a Baseline for Normal Performance

Monitoring solutions doesn't work properly unless you have established a solid baseline for normal performance. A network assessment can help you establish a baseline, as well as set thresholds, so you're alerted if a potential network problem or breach of infrastructure security occurs.

## Receive Documentation of the Findings

All of our findings are delivered to you after the assessment has been completed in a written report. The report will contain all you need to address any issues on the network. We will come onsite and review the report with you, if necessary, or setup a WebEx session to review our suggestions for improvements.

**Ready to Begin Reaping the Benefits  
of a Professional Network Assessment?**
