

MOBILITY

OUR SOLUTIONS ENABLE BUSINESSES TO IMPROVE
WORKPLACE PRODUCTIVITY AND THE
CUSTOMER'S EXPERIENCE.

GET EVERYTHING YOU NEED, RIGHT WHERE YOU ARE

There is no shortage of IoT devices available to you, your employees, and your customers. Currently, there are over 25 million devices being used and, on average, each person uses four (4) separate devices each day to connect, whether personally or professionally, to the world around us.

This surge of mobility has been enhanced due to forward-thinking BYOD policies, which, while they have enabled more flexibility and responsiveness, have presented unique challenges to organizations' IT operations.

BlackHawk Data's team of mobility experts helps organizations manage thousands of devices that access their networks on a regular basis. We specialize in advanced wireless network deployments and custom application development. Our solutions enable businesses to improve workplace productivity and the customer's experience.

Our end-to-end approach helps technology leaders realize their business goals through a comprehensive offerings.

LEARN HOW WE MAKE WIRELESS NETWORKS EASY TO MANAGE

- Design Services
- Deployment
- Turnkey Solutions
- Multi-vendor Offerings

OUR METHODOLOGY FOR PREDICTABLE WIFI PERFORMANCE

- **WLAN Predictive Survey** – a remote survey using software tools to create a plan based on floor plans and number of clients.
- **Pre-Deployment Site Survey** – an on-site survey using both software and hardware tools to create a plan based on the actual radio frequency environment, or to validate the WLAN Predictive Survey.
- **Post-Deployment Site Survey** – an on-site survey to confirm there are no issues with the final deployments.
